Ruby Mountain Outfitter / Guide Prospective Review Team  
USDA Forest Service

To Whom It May Concern:

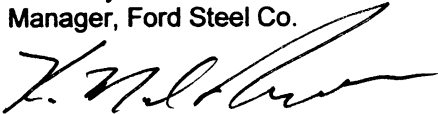

This letter is to respectively urge you to allow Elko Guide Services, in particular Bill Gibson, permission to use U.S. Forest Service Land.

Myself, my family, and our company have used the services offered by Bill Gibson including horseback riding, fishing, and hunting on private and public land for some 15 years now. Bill and his organization have provided all of us with a very unique outdoor experience that you just can't get from other outfitters.

Allowing him to use Forest Service land for his business would certainly give many others a chance to experience what Bill does best.

Sincerely,

Mike Reynolds  
Manager, Ford Steel Co.
