Review Team

I am writing this letter to express to your review team, what a benefit Elko Guide Service (in particular Bill Gibson) has been to our ministry. We provide a rustic camp setting for the youth in the Elko area on our ranch in the Ruby Mountains. We are surrounded by Forest Service land. We have contracted Bill Gibson to provide horsemanship classes as well as trail rides on our private lands for our campers the past three summers. Before that time we contracted Bill to provide overnight horse trips into the Ruby Mountains and day rides into Smith Creek to his cabin. We have found Bill to be very professional at all times and would not entrust our campers to any other outfitter. We believe that Elko Guide Services provides a great service to our community in that we can experience horsemanship without the burden of caring for the animals year around.

We are introducing a new program for college students this summer, a 70 mile back pack through the Ruby Mountains. In order to support this venture we will need to provide our campers with fresh supplies at various points along the way. It is our hope to horse pack these supplies and use Bill Gibson and his staff to provide this service.

It is our sincere hope that your review team reinstate Bill's Forest Service permits, so we can use Elko Guide Service on your lands in the future. Thank you for taking time to consider our concerns.

Sincerely,

Martin McGhin
President
